

Making a compost bag

- Collect a variety of food scraps (vegetable/fruit peelings), newspaper, dry leaves, grass clippings, old hay, coffee grounds, etc.
- Chop or tear the food scraps into small pieces.
- Add a little garden soil and water to the food scraps.
- Mix in a handful of the dry ingredients.
- Seal the bag.
- Shake the bag each day to mix up the ingredients.
- Open the bag for a few hours every second day to aerate compost. Reseal the bag.
- After 4–6 weeks the compost is ready for use.
